

ProLite E2003WSV | 20" Wide

iiyama's most recent addition to the widescreen monitor portfolio, the E2003WSV 20.1" panel is aimed at the user who appreciates the higher 1680x1050 screen resolution but lacks space for a 22". Improved features include an even faster 2ms response time for excellent results in gaming and video playback, increased brightness of 300 cd/m² and a sharp 2000:1 Dynamic Contrast Ratio delivering crisp, vivid images in any application. The smart black casing incorporates stereo speakers and the access controls for the On Screen Display Menu.

Technical data

Megapixel describes the size of your desktop and therefore the amount of information your display can show. A lcd with a physical resolution of 9.2 mega pixels (3840 x 2400) can show 6 times more information than a display with 1.3 mega pixels (1280 x 1024). That means your desktop is about 600 percent bigger.
